

please consider what could happend if you let the passengers use their cell phone when they want to. terrorists could use it to their advantages, they could communicate between them in different parts of the plane and we would never know. I know you may not care about this....but pls put yourselves in our positions. I could provide you with many more reasons, but if this reason is not good enough then how could the others be. I think I have the right to control the situation and not to be controlled.

Thank you
